

Geotrim Oy is a leading location based reseller company in Finland producing complete solutions for surveying, engineering, infrastructure, construction, GIS and agriculture. Geotrim offers versatile and integrated geospatial solutions based on GNSS positioning.

Geotrim is an importer and an authorized reseller of the products of Trimble, a technology leader of the industry. Best known for GPS technology, Trimble integrates a wide range of positioning technologies including GPS, laser, optical and inertial technologies with application software, wireless communications, and services to provide complete commercial solutions.

Geotrim offers complete solutions and services for different fields of operation, both the public and private corporate sector. It is responsible for Trimble's authorized maintenance service, technical support and training. The services of Geotrim include Trimnet VRS as well as other versatile and flexible services from equipment rentals to consulting that can be tailored for the enterprise.

Founded in 2001, Geotrim is the market leader of the industry in Finland. The main objective of the company is to help its customers to succeed and improve their manufacturing efficiency by offering Trimble's integrated solutions which allow customers to collect, manage and analyze complex information faster and easier, making them more productive, efficient and profitable. A profound knowledge of the customers and local special requirements is the basis of Geotrim.

Success and knowledge are based on many years of experience, the regular Trimble training of the staff and on the commitment to be the best of the industry in Finland. Of all the application providers Geotrim has to offer the most individual resources for support, training and maintenance.
